

# Folding Bicycle Installation Instructions:

## 1. Unfolding

01>> next

02>> next

03>> next

04>> next

05>> next

Open the packaging with the bike in the folded state and release the folding clasp.

Align and match the folding parts.

Pull up the latch to the indicated position.

Use the quick-release wrench to appropriately tighten the quick-release screws.

Secure the quick-release clasp as shown in the diagram.

## 2. Handlebar Installation:

01>> next

02>> next

03>> next

04>> next

Rotate the front fork with the curved side facing forward (as shown in the diagram).

Lift the handlebar to match the folding position.

Tighten the quick-release screw upwards.

After securing, fasten the plastic clasp onto the quick-release screw.

## 3. Adjusting Brake Lever Angle:

01>> next

02>> next

03>> next

Use a hex wrench to loosen the screws fixing the handle.

Adjust the handle position.

Reinforce and fix the screws.

#### 4. Adjusting the V-Brake System:

01>> next

Loosen the brake cable fixing screw.

02>> next

Squeeze both sides of the brake pads with one hand while tightening the brake cable.

03>> next

Keep the brake pads squeezed and then fix the brake cable screw.

#### 5. Adjusting the Cantilever Brake System:

01>> next

Loosen the rear brake cable fixing screw.

02>> next

Pull in the indicated direction to maintain the correct position.

03>> next

Tighten the brake cable, then fix the screw.

#### 6. Adjusting the Brake System:

01>> next

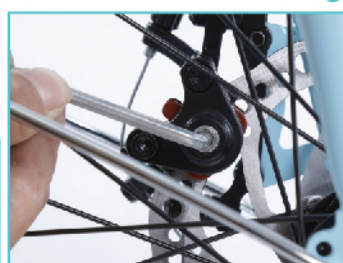

Check the gap on both sides between the brake pads and the disc brake.

02>> next

Loosen the fixing screws to adjust the gap between the brake pads and the outer side of the disc brake.

03>> next

Adjust the gap between the inner disc brake and the brake pad.

04>> next

Different models have different brake types, so please refer to the corresponding tutorial based on the ordered model for adjustments.

#### 7. Adjusting the Rear Mudguard Tilt Angle:

01>> next

Check for deviations.

02>> next

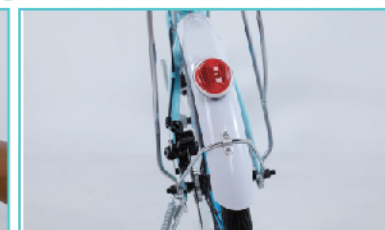

Loosen the screws slightly for adjustment.

03>> next

Push the indicated position by hand.

04>> next

Adjust as shown after adjustment.

#### 8. Installing Pedals:

01>> next

When installing pedals, check for the "L" and "R" markings at the end of the pedal threads.

02>> next

Left pedal corresponds to "L" and should be tightened counterclockwise; right pedal corresponds to "R" and should be tightened clockwise (both towards the front of the bike).

03>> next

Ensure to tighten with a wrench in the forward wheel direction in one go. (Regularly check for pedal tightness.)

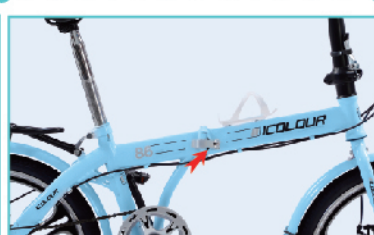

#### 9. Folding Tutorial:

01>> next

Open the seat tube quick release.

02>> next

Open the frame latch.

03>> next

Remove the handlebar latch.

04>> next

Fold easily as shown.
