- 5X8FT
- 6X9FT
- 7X10FT
- 8X11FT
- 9X12FT

READ THIS FIRST!!!

Thank you for purchasing our product

**IN CASE OF MISSING OR BROKEN
PARTS, PLEASE CONTACT PLACE OF
PURCHASE FOR ASSISTANCE.**

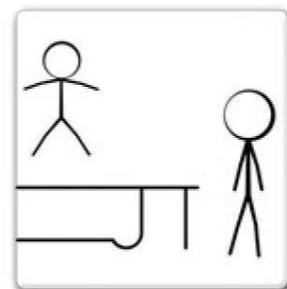

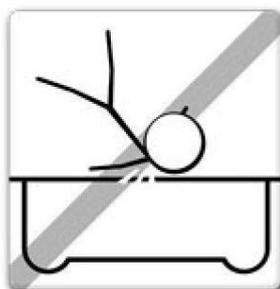

Warning: We are not liable for any injuries that may occur when using the trampoline

GENERAL SAFETY INSTRUCTIONS

BEFORE YOU BEGIN USING YOUR BIG TRAMPOLINE: Read and understand all this information provided to you in this manual. As with all physical sports and activities there is the risk of participants receiving an injury. To ensure your future enjoyment and the prevention of injury, be sure to follow appropriate safety rules and tips.

- ALWAYS CONSULT A DOCTOR/PHYSICIAN BEFORE PERFORMING ANY KIND OF PHYSICAL ACTIVITY
- ALWAYS CHECK YOUR BIG TRAMPOLINE BEFORE USE, PAYING SPECIFIC ATTENTION TO ALL THE BOLTS, JUMP MAT AND PADS POSITION. DON'T USE IF ANY PARTS ARE MISSING OR LOOK LIKE THEY SHOW WEAR AND TEAR
- ALWAYS USES THE PROVIDED SAFETY ENCLOSURE WHEN USING THE TRAMPOLINE.
- ALWAYS ENSURE THAT THE TRAMPOLINE IS USED BY ONLY ONE PERSON AT A TIME.
- ALWAYS ENSURE THAT WHENEVER THE TRAMPOLINE IS USED BY ANYONE AT ANY SKILL LEVEL THAT DO SO UNDER SUPERVISION.
- Stop exercising immediately should you feel unwell or if you feel pain in your joints and muscles. Dizziness is a sign of fatigue and you should stop bouncing and lay down on the ground should you feel dizzy.
- When using this trampoline ensure appropriate clothing is worn, preferably sports wear and socks . NEVER WEAR SHOES ON THE MAT.
- Please be warned that trampoline is spring based and will allow the user to jump to a greater height than that on the ground, so please bear this in mind and ensure that you are comfortable bouncing at low heights first.
- Proper assembly, care and maintenance of product, safety tips, warnings, and proper techniques for jumping on your trampoline are included in this manual for your safety and an extended product life span. All users and supervisors should therefore familiarize themselves with these instructions. Anybody who chooses to use the trampoline must be aware of their own limitations with regards to performing skills on this trampoline.
- The safety enclosure is there to prevent the user falling off the trampoline, and is not to be jumped into unnecessarily.
- Trampoline should be assembled on grass or BSI approved safety matting.

INFORMATION ON THE USE OF TRAMPOLINE

INITIALLY, you should get accustomed to your trampoline and understand how much spring is in each bounce .The focus at this point should be body position and technique until each skill can be completed with ease and control.

- **BEFORE YOU TRY TO JUMP TOO HIGH** the technique for stopping should be learned as this will help prevent injury should you feel you are jumping out of control.
- As the user lands on the bed knees should be bent so that they stop and absorb the spring in the mat. The position is shown in the image to the left. Arms are held out for increased level of balance.
- **This skill is used when the trampoline user wishes to stop bouncing on the trampoline due to fatigue, loss of control, etc.**

SOMERSAULTS (FLIPS): DO NOT PERFORM somersaults of any type (backwards or forwards) on this trampoline. If you make a mistake when trying to perform a somersault, you could land on your head or neck .This will increase your chances of your neck or back being broken, which could result in death or paralysis.

FOREIGN OBJECTS : DO NOT use the trampoline if there are pets ,other people ,or any objects underneath the trampoline .This will increase the chances of an injury occurring ,DO NOT hold any foreign objects in your hand and DO NOT place any objects on the trampoline while in use. DO NOT place the trampoline under over-hanging objects like tree branches, wires, etc. as these will increase your chances of being injured.

POOR MAINTENANCE OF TRAMPOLINE: A trampoline in poor condition will increase your risk of being injured. Please inspect the trampoline before each use for bent steel tubes, torn mat, loose or broken springs and overall stability of the trampoline.

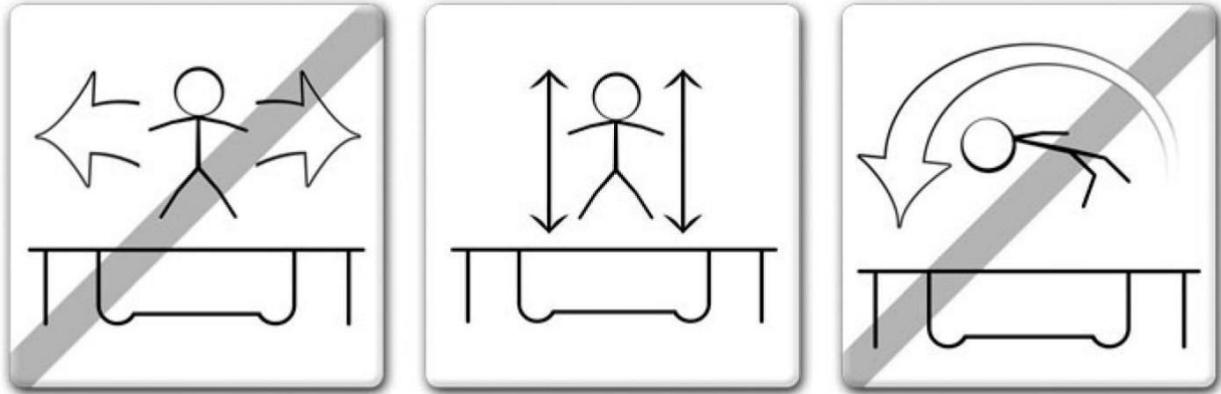

WEATHER CONDITIONS: Please be aware of the weather conditions when using the trampoline. If the mat of the trampoline is wet, the user could slip and injure himself /herself .If it is too windy, the user could lose control.

RESTRICTING ACCESS: When the trampoline is not in use, always store the access ladder in a secure place so that unsupervised children can not play on the trampoline.

TIPS TO REDUCE THE RISK OF ACCIDENTS

In order to reduce the risk of accident the "TRAMPOLINE USER" should:

- Always remain in control of their jumps and body position at all times.
- Not attempt to perform skills that are beyond their own level of competence.
- Read and understand the jump by taking off and landing in the middle of the trampoline.
- Always control their jump by taking off and landing in the middle of the trampoline.
- Always jump vertically and refrain from bouncing towards the springs in any direction.
- Always consult a professionally certified trampoline instructor before attempting anything beyond basic techniques.

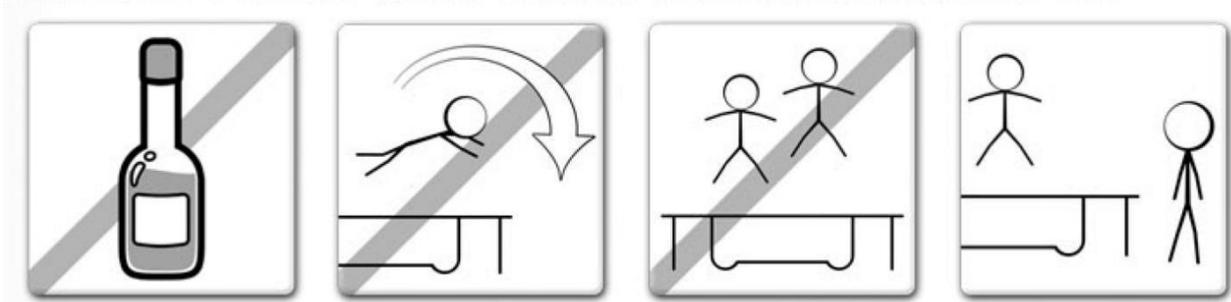

In order to reduce the risk of accident the "SUPERVISOR" should:

- Fully understand and enforce all the safety rules and guidelines.
- Advise the trampoline user and provide knowledge in what they are doing right and wrong to ensure the safety of trampoline user.
- Be aware and advise the trampoline user of all the safety warnings.

IMPORTANT: If the Trampoline can not be supervised there should be a method for securing it and preventing anyone from using the product until supervision is available.

TRAMPOLINE SAFETY INSTRUCTIONS

ADVISORY PRECAUTIONS WHILE USING THE TRAMPOLINE

- Do not use trampoline if you have consumed alcohol or narcotic substances
- You should climb on and off the trampoline in a controlled and careful manner. Never jump onto or off the trampoline and never use the trampoline as a means to bounce onto or into another object.
- Always learn the basic bounce and master each type of bounce before trying more difficult types of bounces. Review the basic skills section to learn how to do the basics.
- To stop your bounce, flex your knees when you land on your feet.
- Always be in control when you are bouncing on the trampoline. A controlled jump is when you land at the same spot that you took off from. If at any time you feel out of control, stop bouncing immediately.
- Do not jump or bounce for prolonged periods of time or too high for a number of jumps. Keep your eyes on the mat to maintain control. If you do not, you could lose your balance.
- Never have more than 1 person on the trampoline at any one time.

ADVISORY PRECAUTIONS WHILE SUPERVISING TRAMPOLINE

IMPORTANT: Familiarize yourself with the basic jumps and safety rules. To prevent and reduce the risk of injuries, ensure that all safety rules are enforced and the new users learn the basic bounces before trying more advanced techniques.

- **ALL USERS need to be supervised, regardless of skill level or age.**
- Never use the trampoline when it is wet, damaged, dirty or worn out. The trampoline should be inspected before use.
- Keep all objects that could interfere during use away from the trampoline at all times. Be aware of what is overhead, underneath and around the trampoline.
- To prevent unsupervised and unauthorized use, the trampoline should be secured at all times.

ACCIDENT CLASSIFICATION & IDENTIFICATION

MOUNTING AND DISMOUNTING:

Be very careful when getting on and off the trampoline. **DO NOT** mount the trampoline by grabbing the frame pad, stepping onto the springs or by jumping onto the mat of the trampoline from an object (eg. A deck, roof or ladder).This is considered highly dangerous. **DO NOT** dismount by jumping off the trampoline and landing on the ground. If small children are playing on the trampoline, they may need help in mounting and dismounting.

USE OF ALCOHOL OR DRUGS:

DO NOT consume any alcohol or take any drugs (*this includes medication that could affect the users co-ordination*) when using this trampoline. This is considered highly dangerous since these foreign substances impair your judgments, reaction time and overall physical co-ordination.

MULTIPLE USERS:

If you have multiple users (more than one person on the trampoline at any one time), you increase the chance of being injured. Injuries can occur when you fly off the trampoline, lose control, collide with other jumper(s), or land on the springs.

STRIKING THE SPRING FRAME:

When playing on the trampoline, **STAY** in the centre of the trampoline mat. This will reduce the risk of being injured by landing on the spring frame. Always keep the frame pads covering the frame of the trampoline. **DO NOT** jump or step onto the frame pad directly since it is not intended to support the weight of a person.

LOSS OF CONTROL:

DO NOT try difficult maneuvers until you have mastered the basics. If you do not follow these guidelines, you increase the risk of someone being injured.

TECHNIQUES BASIC SKILLS

BASIC SKILL 1: The Basic Bounce

- Start from a standing position, with feet shoulder width apart head up and eyes on the trampoline bed.
- Swing arms forward and up above head in a circular motion.
- Bring legs and feet together in " mid-air " position and point toes.
- Land back on the mat with feet shoulder width apart (same as start position).
- Why not try moving onto the next skill once comfortable and proficient.

BASIC SKILL 2: The Knee Drop

- Start with a low basic bounce (as detailed in BASIC SKILL 1).
- Land on knees shoulder width apart, keeping back straight and a strong body position using arms out to the side or in front to maintain balance.
- Bounce back to basic bounce position by using bounce momentum and swinging arms above head.
- Once mastered at this height try bouncing a little higher, but remember to always stay in control of your height.

BASIC SKILL 3: The Seat Drop

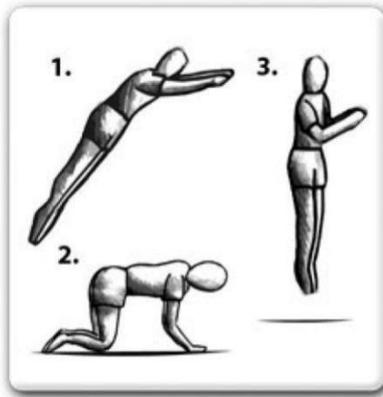

- Start with a low basic bounce (BASIC SKILL 1) in the normal
- Land with legs out straight in front of you, with hands either side of your hips and back straight in a strong body position.
- Use the bounce momentum aided with a push from hands to return to a standing position.
- Once mastered at this height try bouncing a little higher, but remember to always stay in control of your height.

IMPORTANT: Please consult a trained trampoline instructor before attempting any more advanced skills to ensure highest possible safety levels are maintained.

ADVANCED SKILLS

ADVANCED SKILL 1: The Basic Bounce

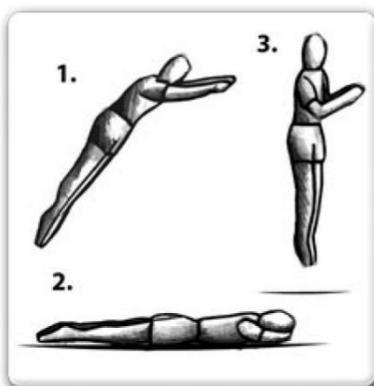

- Start with a low basic bounce (BASIC SKILL 1) in the normal position.
- Land on your hands and knees at the same time, ensure that back is horizontal to the bounce mat and hands & legs are shoulder width apart also.
- Use the momentum of bounce and push off hands to regain the standing position.
- Once mastered at this height try bouncing a little higher, but remember to always stay in control of your height.
- Try moving onto the next skill once comfortable and proficient.

ADVANCED SKILL 2: Hands and Knees to Front Drop

- Land on your hands and knees at the same time, ensure the back is horizontal to the bounce mat and hands & legs are shoulder width apart also.
- Maintain strong body position with back horizontal to mat and straighten legs behind and fold arms in front of face in mid-air ready to land on the mat in a lying down position.
- Ensure the landing is done with all of body touching the mat at same time.
- Push off hands and recover the standing position.
- Once mastered at this height try bouncing a little higher, but remember to always stay in control of your height. Trying moving onto the next skill once comfortable and proficient.

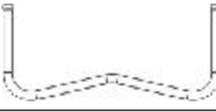

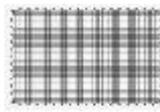

ADVANCE SKILL 3: The Front Drop

- Start with a low basic bounce (BASIC SKILL 1) in the normal position.
- Maintain strong body position with back horizontal to mat and straighten legs behind and fold arms in front of face in mid-air ready to land on the mat in a lying down position.
- Ensure the landing is done with all of body touching the mat at the same time.
- Push off hands and recover the standing position.
- Once mastered at this height try bouncing a little higher, but remember to always stay in control of your height.

IMPORTANT: Should you wish to progress any further and learn more advanced techniques for trampolining, please consult a qualified and registered instructor.

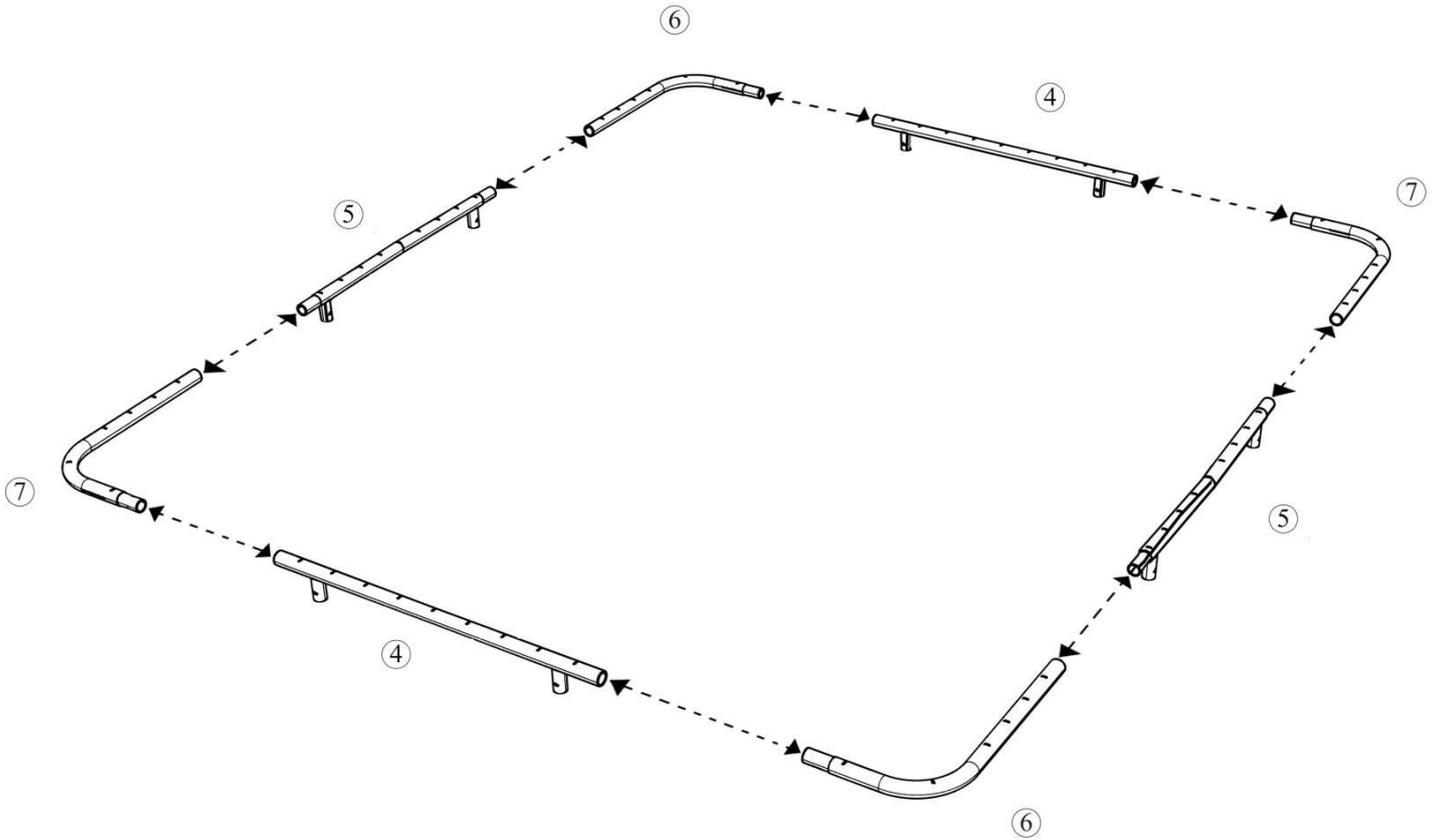

Trampoline pack contents

Trampoline Assembly

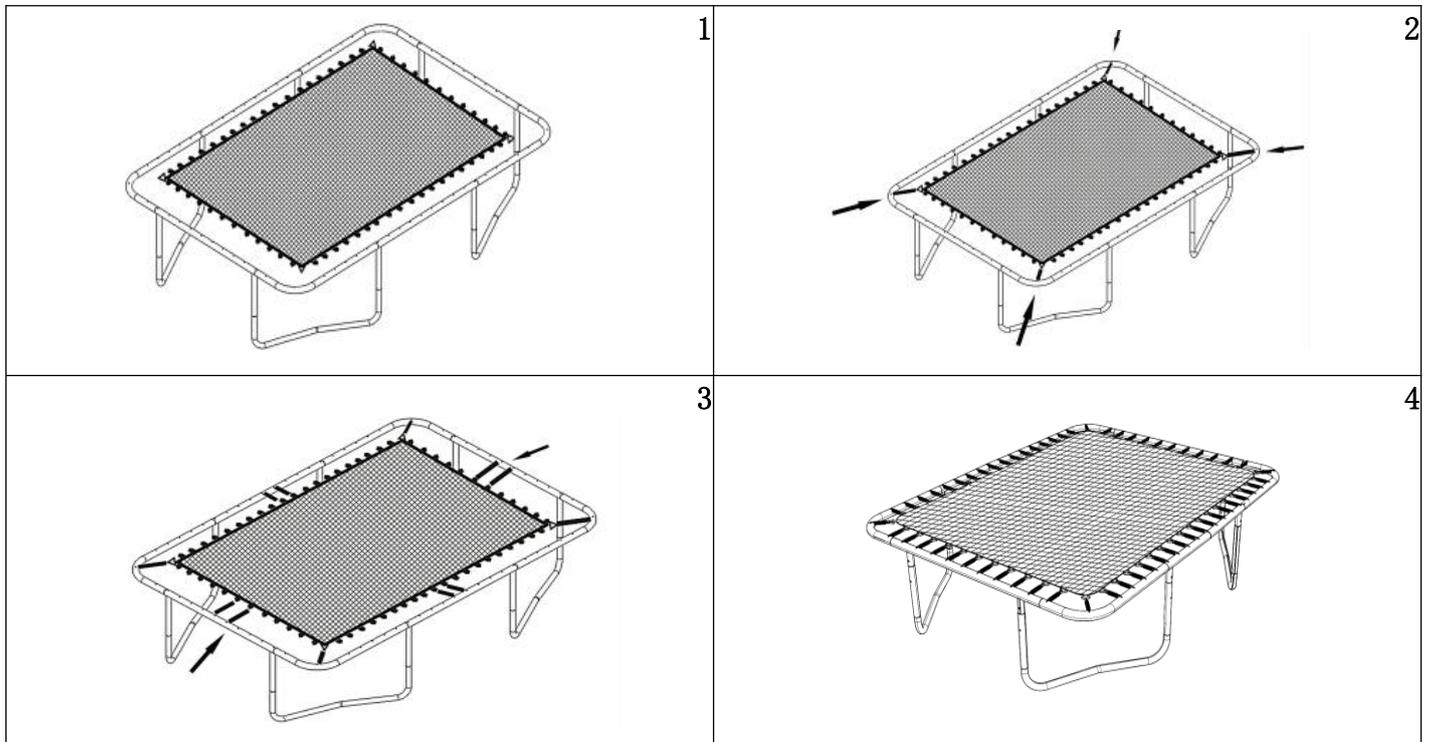

Step1 Lay out the frame tube as picture shows and gradually connect it.

Step 2 Connect the vertical extension tube and leg tube as picture.

Step 3. Lay out the “Trampoline Mat” inside the frame on the floor. And install the springs in diagonal pairs, first the 1/2 of the trampoline, then 1/4, then 1/8 and so forth. Please attach springs as instruction in proper order, otherwise frame would be damaged.

WRNING: Attaching springs, the connector points can become pinch points since the trampoline is tightening up. With this in mind please be careful attaching springs to the trampoline mat. Please be careful.

You will need at least one person to help with this portion of assembly.

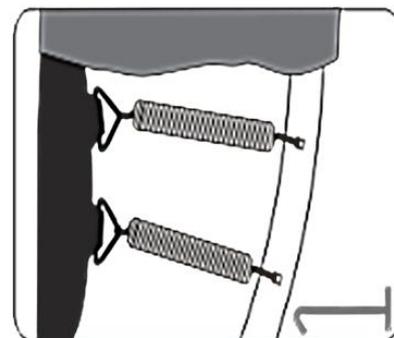

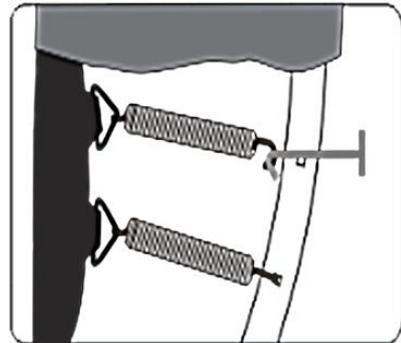

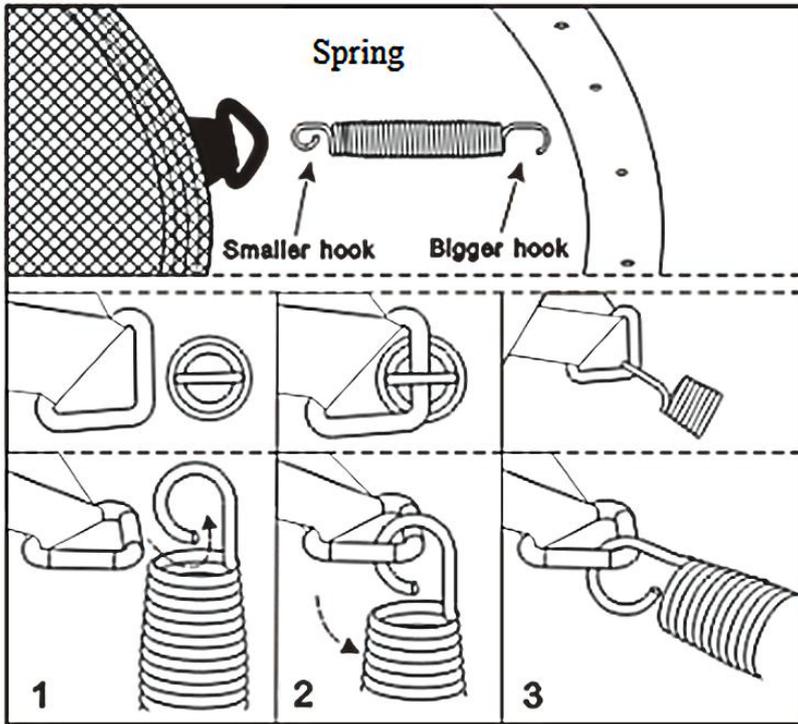

STIPS : HOW TO USE THE " SPRING LOADING TOOL "

Firstly hang one side of spring on the triangle attached to the "Trampoline Mat" and use the " spring tool "to hook the other side of spring (As shown in the top image to the right) .

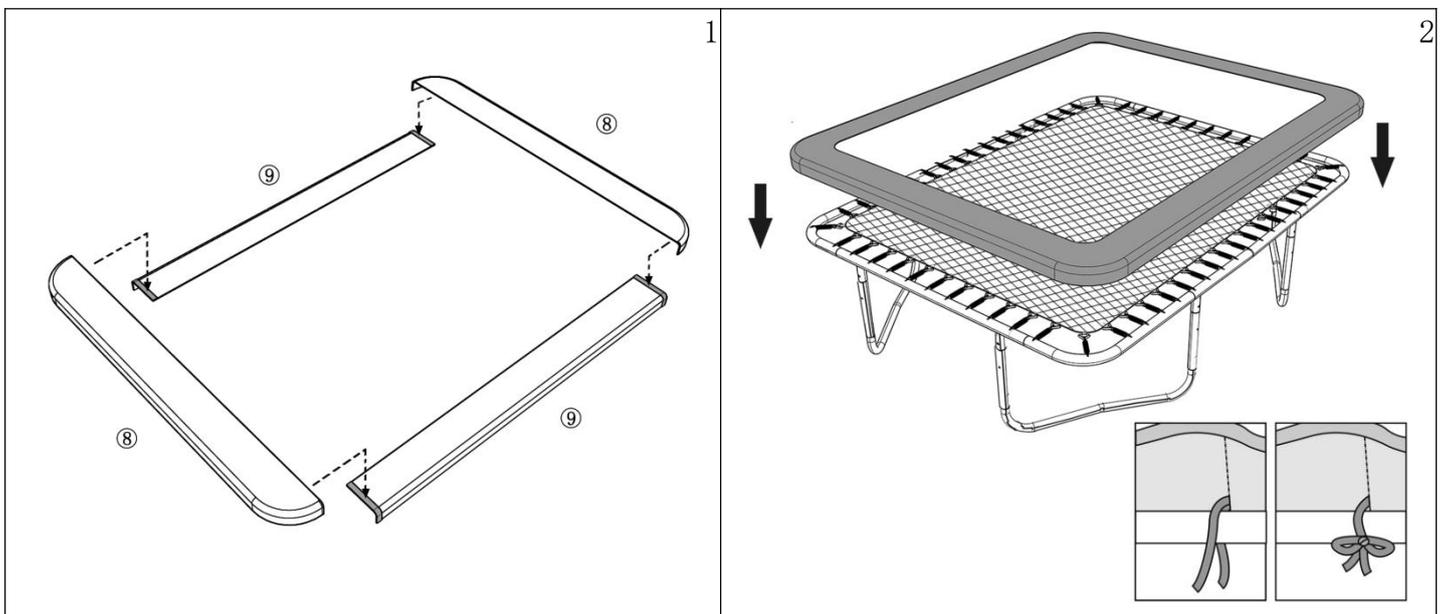

Pull the "Spring Tool" until the spring hook insert the hole on the "trampoline frame" and disengage the "Spring Tool" leaving the "Spring "in place. Repeat process for all springs .

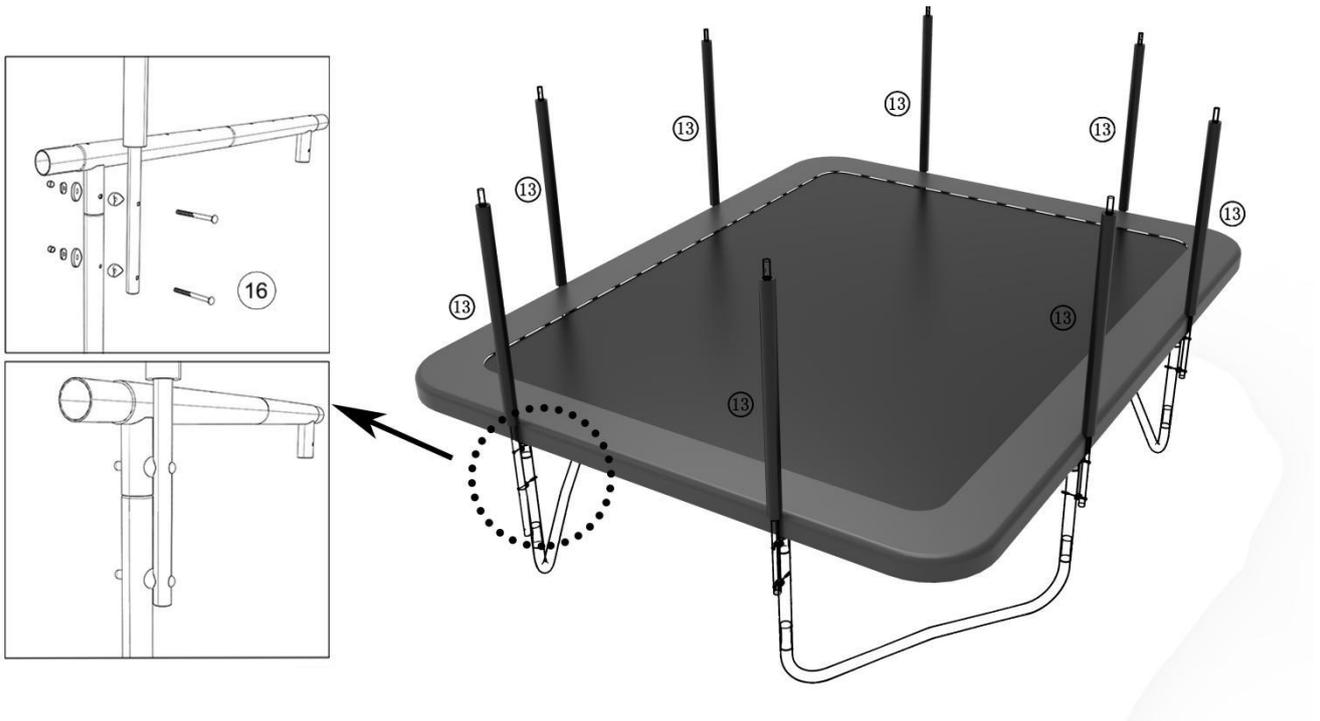

WARNING! : Please be careful where your hands and other parts of the body are placed as the connector points and spring attachments can create hand or body traps.

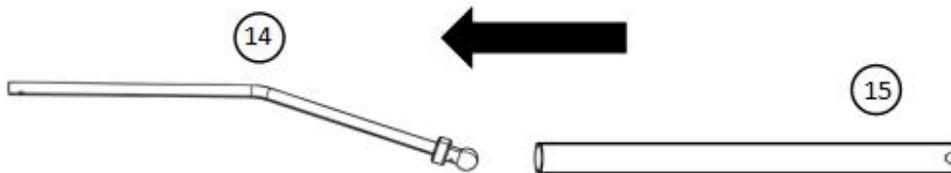

Step 4. Layout the spring cover as picture and stick together. (FIG1)
Put it to the the top of trampoline frame. And tie the strap located at the under side of spring cover to the frame.(FIG2)
Please ensure that the Frame Pad covers all metal parts.

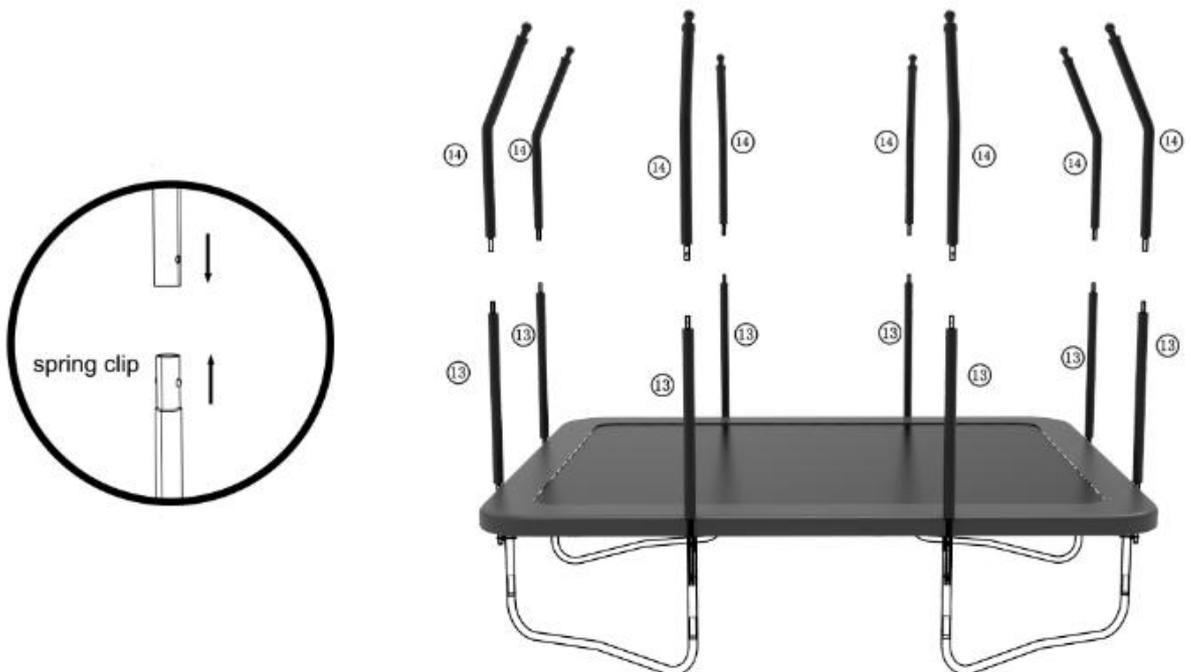

Step 5. Line up the bottom net poles with the holes in the leg extensions on the main frame as shown, pass the coach bolts through the leg, bar spacer, frame leg add the curved washer, tighten off with the capped nuts on the inside of the leg assembly. Repeat this process until all of the bottom net poles are set up.

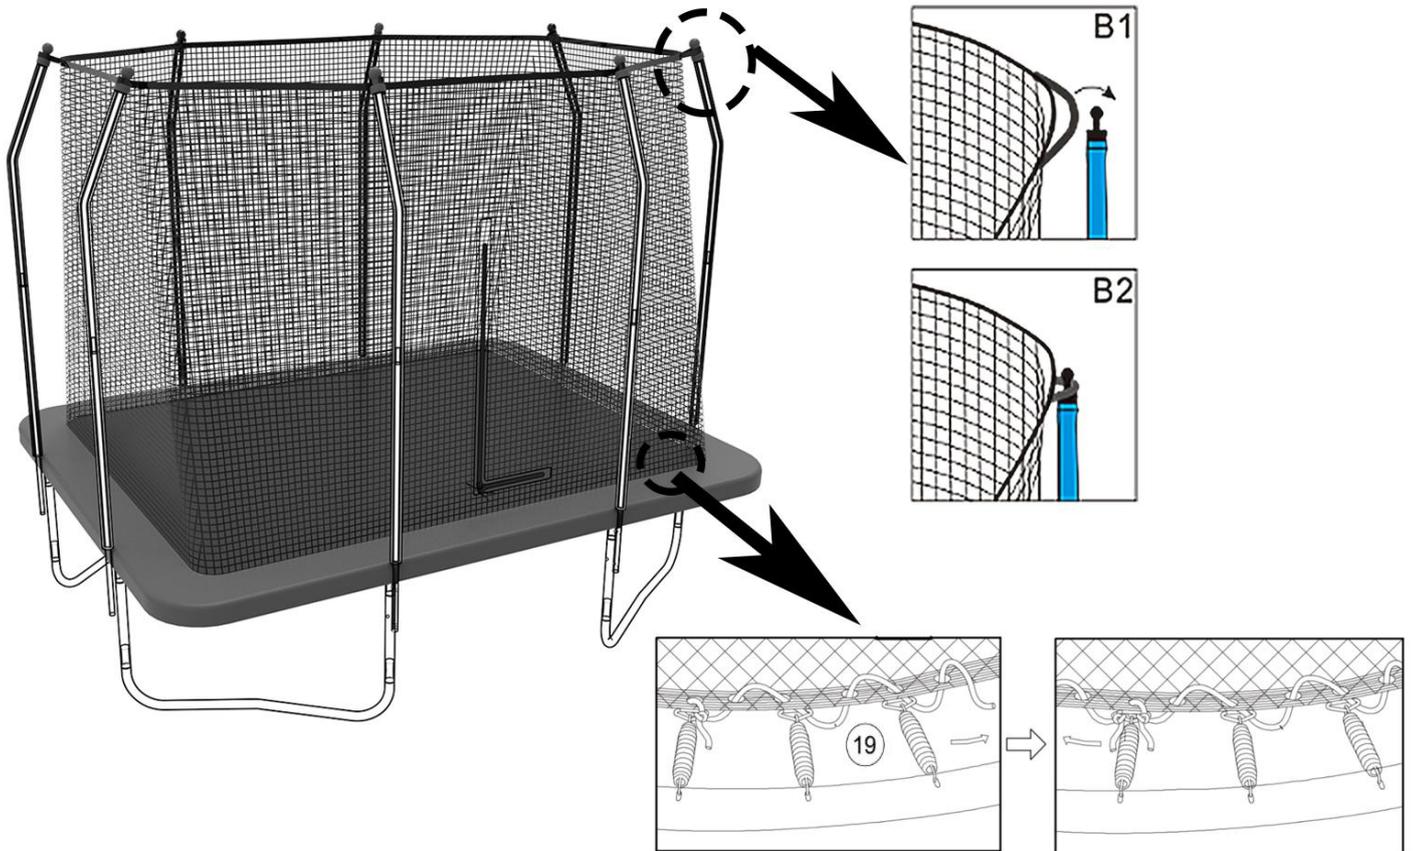

Step 6. Over the top pole slide the waterproof cover sleeve ensuring it slides over the top of the cap but not over down the top pole.

Step 7. Connect the top pole tube with the bottom pole tube, depress the spring connector and carefully slide the two sections together until the spring connector pops out of the locating hole. Then pull down the sleeve to the bottom. Repeat this process until all of the net poles are connected.

Step 8. Spread the safety net out on the mat to let the door entrance be on the long side of rectangular and begin to hang the top of the net over the pole caps with the integral hanging points. Then fix the safety net to the trampoline mat by net rope at bottom.

WARNING! You should go back and re-stretch all the net components periodically and re-tie it to ensure the net is taught and stands stiff at all times. If it is left to sag or loosen it will compromise the safety of your trampoline and its users.

This should complete the assembly of your trampoline, please ensure you have read and understood all of the safety information and instructions prior to use.

Moving the trampoline

If you need to move the trampoline, two people should be used. When moving, lift the trampoline slightly off the ground and keep it horizontal to the ground. For any type of other move, you should disassemble the trampoline.
