

Installation Instructions:

Step 1: Assembling the Trampoline Spring Mat

1. Organize all the accessories for the base circle.

2. Assemble the steel pipes with holes and four-way connectors in sequence.

3. Prepare the trampoline mat, springs, and installation tools.

4. Install one spring first next to the four-way connector.

5. Then, install the springs on the other side.

6. Finally, complete the installation of the remaining springs, as shown in the diagram.

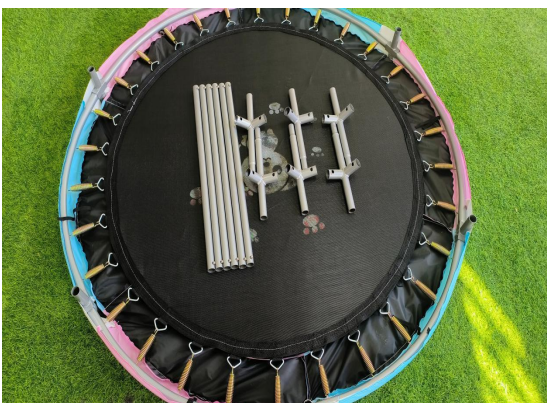

7. Secure the trampoline mat in place.

Step 2: Installing the Hexagonal Base

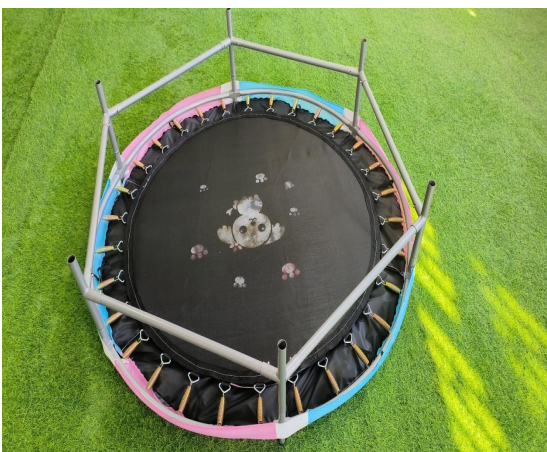

1. The accessories needed for the hexagonal base are shown in the diagram.

2. Install the legs of the hexagonal base in sequence.

3. Connect the crossbars.

4. Install the suction cups on the base.

Step 3: Installing the Columns

1.The accessories needed for installing the columns.

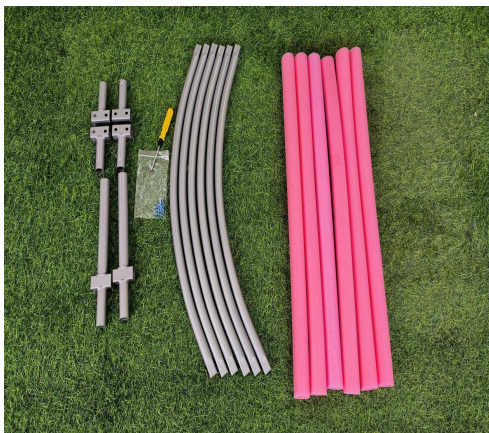

2. Install the columns one by one on the four-way connectors of the base.

Step 4: Installing the Handrail Ring

1. The accessories needed for installing the handrail ring.

2. Assemble the handrail steel pipes using three-way connectors, four-way connectors, and foam pipes in sequence, and tighten the screws.

3. Assemble the handrail and trampoline.

Step 5: Installing the Horizontal Bar

1. The accessories needed for installing the horizontal bar.

2. Assemble the L-shaped steel pipes and nuts onto the trampoline.

3. Then, assemble the horizontal bar.

4. Install the safety net.
